Portfolio: j0nbennett.github.io/portafolio-web/en/

Professional Profile

Senior QA Analyst with experience in software testing and automation for web and mobile applications in financial services. Previous software development experience with Oracle APEX, PL/SQL and JavaScript. Knowledge of requirements analysis, databases and API validation tools. Focused on product quality, team collaboration and process improvement.

Technical Skills

QA and automation: Playwright, Katalon Studio, JMeter, Postman, SoapUI and TestLink. Testing of web applications, Android and iOS mobile apps, and POS terminals.

Data and development: Oracle Database, MySQL, PostgreSQL, DBeaver, PL/SQL, Oracle APEX, JavaScript and JasperReports.

Delivery and technical environment: Jira, Confluence, GitLab, Grafana, AS400, MobaXterm, PuTTY, Android Studio and Flutter.

Quality Assurance Experience

QA Analyst | ITAE / Solar Banco

September 2024 - Present | Asunción, Paraguay

- Test banking software and Android/iOS mobile applications.
- Use Playwright for test automation.
- Tools: Postman, Jira, Confluence, MySQL, PostgreSQL, DBeaver, GitLab, Grafana, Android Studio and Flutter.

QA Analyst | Bancard

January 2024 - September 2024 | Asunción, Paraguay | Fixed-term contract

- Performed software testing, automation and POS terminal testing.
- Tools: JMeter, Postman, MySQL, Jira, Confluence, MobaXterm and AS400.

QA Analyst | Banco Familiar

October 2022 - January 2024 | Asunción, Paraguay | Fixed-term contract

- Performed software testing and automation with JMeter, SoapUI, TestLink and Katalon Studio.
- Additional tools: Oracle Database, Jira, PuTTY and Microsoft 365.

Artificial Intelligence and QA Implementations

Implemented AI-assisted QA workflows using Codex, Jira Rovo and MCP integrations, connecting test-case definition, test execution and evidence recording.

- Integrated Codex with Postman, and Postman with Jira; used Rovo to generate test cases.
- Created Playwright test specifications and executed them with Codex. Generated PDF evidence and published results as Jira comments.
- Validated issues through Atlassian MCP, consulted Swagger through another MCP when needed, and compared data to prepare API tests.
- Created Postman collections for manual execution and recorded results in the corresponding Jira issue.
- Created a runner to execute tests in GitLab.

Software Development Experience

Software Developer | Kove S.A

December 2021 - January 2024 | Asunción, Paraguay

- Developed custom software, analysed requirements and designed solutions.
- Technologies: Oracle APEX, PL/SQL, JavaScript, Oracle Database and JasperReports.
- Resolved software issues and collaborated with the team, applying knowledge of quality assurance.
- Contributed to projects for Banco Familiar, Unimed, Compúpar, Wicomm, Yoga Fitness, Coarco, Revita, Bonus, Galena and Kove.

Additional Experience

Customer Service Representative | Voicenter

October 2019 - February 2022 | Asunción, Paraguay

- Provided customer service, resolved problems and managed conflicts.

Consumer Credit Sales Representative | Universo

February 2019 - August 2019 | Asunción, Paraguay

- Sold financial products, negotiated with customers and provided customer support.
